save_help_file_images *Save Rd File Images*

Description

Only objects of class `gtsummary`, `gt`, or `flextable` will be saved. Object names must end in `_ex` or `_ex[:digit:]`

Usage

```
save_help_file_images(
  path = here::here(),
  pkg = basename(path),
  rd_files = NULL,
  delete_existing_pngs = NULL,
  path.output = file.path(path, "man", "figures"),
  run.dontrun = TRUE,
  run.donttest = TRUE
)
```

Arguments

<code>path</code>	path to package directory. Default is <code>here::here()</code>
<code>pkg</code>	Name of package. Default is the folder name in <code>path=</code>
<code>rd_files</code>	Character vector of Rd file names to search. Default is all Rd files. Include the <code>.Rd</code> extension in the file names.
<code>delete_existing_pngs</code>	Logical indicating whether to delete all png files in the <code>~/man/figures/</code> folder. Default is to ask interactively when <code>rd_files = NULL</code> . Otherwise, <code>FALSE</code>
<code>path.output</code>	directory where images will be saved. Default is <code>file.path(path, "man", "figures")</code>
<code>run.dontrun</code>	logical indicating that <code>\dontrun</code> should be ignored.
<code>run.donttest</code>	logical indicating that <code>\donttest</code> should be ignored.

shrink_help_file_images

Shrink Rd File Images

Description

Shrink Rd File Images

Usage

```
shrink_help_file_images(  
  path = here::here(),  
  pkg = basename(path),  
  image_files = NULL,  
  path.output = file.path(path, "man", "figures")  
)
```

Arguments

<code>path</code>	path to package directory. Default is <code>here::here()</code>
<code>pkg</code>	Name of package. Default is the folder name in <code>path=</code>
<code>image_files</code>	Character vector of .png file names to shrink. Default is all png files in the <code>~/man/figures</code> folder that end with <code>_ex[digits].png</code> or <code>_ex.png</code> that do not begin with <code>README-</code> .
<code>path.output</code>	directory where images will be saved. Default is <code>file.path(path, "man", "figures")</code>
